Chapter 1 : Knew Phoenix Sarton Norton Company New

In astronomy, the geocentric model (also known as geocentrism, or the ptolemaic system) is a superseded description of the universe with earth at the center. under the geocentric model, the sun, moon, stars, and planets all orbited earth. the geocentric model served as the predominant description of the cosmos in many ancient civilizations, such as those of aristotle and ptolemy. The roman empire was among the most powerful economic, cultural, political and military forces in the world of its time. it was one of the largest empires in world history its height under trajan, it covered 5 million square kilometres.
